MUHAMMAD KASHIF ALI

kashifalii3850@gmail.com

SUMMARY

Skilled in Python programming and machine learning with practical knowledge of TensorFlow/Keras, PyTorch, and scikit-learn frameworks. Experienced in NLP and computer vision applications and integrating AI services with production workflows.

SKILLS

Python, Machine Learning, NLP, Computer Vision, Scikit-learn, MLOps, Data Engineering, Cloud Platforms, PyTorch, TensorFlow, TensorFlow/Keras, Deep Learning, C/C++ (Basic), JavaScript, Generative AI, LLMs, RAG, AI Agents, NumPy, Pandas, OpenCV, NLTK, Streamlit, PostgreSQL, Pinecone, SQLite, n8n, Make.com, VAPI, ElevenLabs

EXPERIENCE

AI Engineer Intern, Spadasoft | Jun 2026 - Aug 2026

- Developed a retrieval-augmented generation (RAG) based chatbot for document question-answering using large language models, embeddings, and vector search.
- Built document processing workflows including text extraction, chunking, embedding generation, and contextual response creation.
- Created an AI Room Service Voice Agent integrating voice AI, telephony, LLMs, and APIs to automate hotel room-service tasks and customer interactions.
- Integrated AI services, REST APIs, and automation workflows into web applications for practical business solutions.

PROJECTS

RAG-Based Chatbot | RAG, LLM, Pinecone, Python, NLP

- Built a document-based chatbot using RAG, embeddings, vector search, and LLMs for context-aware question answering.
- Implemented document upload, text processing, chunking, embedding generation, and semantic retrieval capabilities.

AI Room Service Voice Agent | VAPI, Twilio, ElevenLabs, LLM, API Integration, N8N

- Developed a voice AI agent for hotel room-service automation supporting natural customer conversations.
- Designed workflows handling guest requests, room-service orders, and service-related queries through AI automation.
- Integrated voice AI, telephony APIs, and LLMs for real-time automated interactions.

Movie Recommendation System | Machine learning, NLP, Cosine similarity

- Optimized model performance through data preprocessing and vectorization, achieving over 90% recommendation accuracy.

Social media automation | N8N, Facebook & LinkedIn API Integration, Webhook

- Built social media automation workflows using n8n to create, schedule, and publish content automatically on Facebook and LinkedIn.

EDUCATION

Virtual University Lahore, Pakistan | Bachelor of Science, Computer Science | Jan 2023 - Jan 2027

CERTIFICATIONS

Fundamentals of AI and ML | Microsoft | Feb 2026

Introduction to Natural Language Processing | Great Learning | Jan 2026

Machine Learning | Innovista | Dec 2025

Programming Essentials in Python | Cisco Networking Academy | Sep 2025
